

Student Performance Outcome Report (2023–2024)

Overview

This is a comparative analysis of student performance outcomes for the years 2023 and 2024 based on key performance indicators (KPIs). The data highlights improvements in student achievement, satisfaction, and learning outcomes at AEG.

KPI	Year 2024 (%)	Year 2023(%)
Student Attrition rate	0	0
Student Passing rate	96.35	94.56
Quality of passes	48.65	43.56
Overall Student Satisfaction rate	94.91	94.35
Graduation rate	100	100

Student Attrition Rate

2023: 0%

2024: 0%

Analysis: The attrition rate remained at 0% for both years, indicating that all enrolled students continued through their courses. This demonstrates effective student engagement and retention strategies.

Student Passing Rate

2023: 94.56%

2024: 96.35%

Analysis: The passing rate increased by 1.79 percentage, showing a consistent improvement in student performance. This suggests enhanced academic support, better course delivery, and increased student motivation.

Quality of Passes

2023: 43.56%

2024: 48.65%

Analysis: The quality of passes improved by 5.09 percentage, indicating that a higher proportion of students achieved higher grade ("A"). This may be attributed to AEG's extra classes, applied learning methods, and continuous assessment improvements.

Overall Student Satisfaction Rate

2023: 94.35%

2024: 94.91%

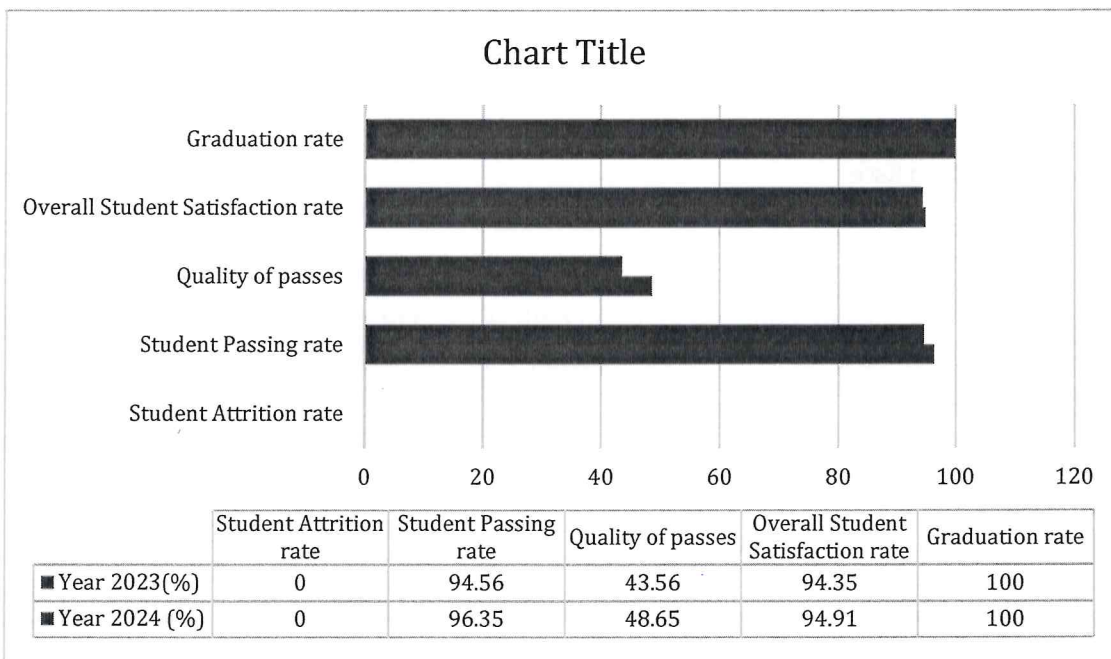

Analysis: Student satisfaction rose slightly, reflecting consistent quality in teaching, learning support, and overall educational experience. Continuous feedback collection and improvements in lecturer engagement likely contributed to this positive outcome.

Graduation Rate

2023: 100%

2024: 100%

Analysis: The graduation rate remained at 100%, confirming that all students who completed their studies successfully met graduation requirements.

The chart above Show performance data of past two years.

Conclusion

Overall, AEG demonstrated positive trends in key academic and satisfaction metrics between 2023 and 2024. The introduction of remedial classes, interactive teaching, and structured student feedback mechanisms has resulted in measurable improvements, particularly in passing rates and quality of passes.
